Dear Team,

This letter is to express my interest in the job for a junior level backend software Engineer. As you'll see, I have over 1.5 years of hands-on experience efficiently using modern Python, Django, HTML5, CSS, Javascript, C++ etc.

In my university life, I participated in more than 200 programming competitions and so my strongest point is algorithm and data structure. At my current company, I am responsible for building server-side architecture, API and analysing fintech data using different machine learning algorithms.

Building state-of-the-art, easy to use, user-friendly applications is truly a passion of mine and I am confident I would be an excellent addition to your organization. In addition to my knowledge base, I actively seek out new technologies and stay up-to-date on industry trends and advancements. This has allowed me to stay ahead of the curve and deliver exceptional work to all of my employers.

I can be reached anytime via my cell phone, 080-7846-7852 or by email at mahbuburrahman2111@gmail.com.

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Regards and Thanks,
Md Mahbubur Rahman
